Phishing Email Investigation Report

1. Executive Summary

This report presents the analysis of a suspicious email containing a PDF attachment. The investigation reveals that the email is part of a phishing campaign designed to lure users with financial information.

2. Email Overview

Sender Email: prestonconstance587@gmail.com

Recipient: phishing@pot

Subject: Encoded (Base64 format)

Date: 26 July 2023

Attachment: csWuYjyqO2IR.pdf

3. Header Analysis

Originating IP Address: 20.97.213.223

SPF: Pass, DKIM: Pass, DMARC: Pass

Even though authentication passed, the email is suspicious because attackers often use legitimate services like Gmail.

4. Content Analysis

The email content is written in Portuguese and refers to a financial balance. It urges the user to open the attachment, which is a common phishing technique.

5. Attachment Analysis

File Name: csWuYjyqO2IR.pdf

File Type: PDF (Base64 decoded)

Tool Used: IronPDF

Auto-generated PDFs are commonly used in phishing campaigns to embed malicious links or fake login pages.

6. Indicators of Compromise (IOCs)

Email: prestonconstance587@gmail.com

IP Address: 20.97.213.223

Attachment: csWuYjyqO2IR.pdf

7. Conclusion

This email is classified as a phishing attack. It uses social engineering techniques and a suspicious attachment to trick users into revealing sensitive information or downloading malware.
